

7 Great Reasons To Buy Hazorea Water Lilies

7 Great Reasons To Buy Hazorea Water Lilies

Every Hazorea water lily rhizome has been grown in mud ponds, in completely natural, near perfect conditions without any artificial fertilizers or sprays. Completely "Fish Proof"

Every Hazorea water lily rhizome you receive is a new vital growing plant that has just been harvested especially for your order, and not from pre-harvested stock kept in cold storage.

Every Hazorea water lily rhizome you receive is guaranteed disease free as it is an entirely new plant, grown from an eye during the previous season. We always harvest the entire plant and replant our ponds every year.

Every Hazorea water lily rhizome you receive has gone through its winter dormancy period and is completely capable of surviving through freezing winter temperatures under ice.

Every Hazorea water lilies is a true-to-type cultivar. We take great pains to keep our lilies separate to prevent them from seeding and we check and cross check their authenticity.

Hazorea can provide you with rare cultivars that are not readily available on the market, and help you improve your sales through marketing unique varieties that your competition would love to have.

You decide what you want. We can cut rhizomes to suit your pots or grow varieties especially for you. We provide you with the support and information to get your plants to flourish, and with the materials and know-how to increase sales and improve your bottom line.
